NHU Q. TRINH

Full Stack Engineer with a passion for data mining and consumer accessibility. Clear communicator due to experience in negotiation, system integration and working with various remote teams.

PROJECTS

WanderList – *Node.js, Express.js, PostgreSQL, Google and Yelp API*
- ▸ Built a Node web application with a SQL database that allows users to easily save travel destinations and attractions

Mood App – *MongoDB, Express.js, React.js, Node.JS, various APIs*
- ▸ Worked in a group to build a MERN stack app that helps users track their mood and provide conditional content
- ▸ Served as Git master and responsible for client-side React components

Jukebox - *Node.js, Express.js, PostgreSQL, Spotify API*
- ▸ Worked in a group to build an app that allows users to add songs to a party's playlist
- ▸ Served as Git master, responsible for server-side database tables, CRUD operations and RESTful routing

BlackJack – *JavaScript, Materialize CSS*
- ▸ Built a JavaScript game complete with sound effects and various game win/blackjack/draw/lose scenarios

ADDITIONAL EXPERIENCE

Glansaol - *Sr. Operations Specialist*   **Jun 2017 – Nov 2018**
Maximized the rapid growth of Glansaol brands through reporting and analysis of operational spending
- ▸ Ensured omni-channel operational capabilities in the transition to a new ERP (NetSuite/ Dynamics 365)

Royal Dutch Shell - *Sr. Operations Analyst*   **May 2013 – Aug 2016**
Led a team of 5 with a focus on decreasing operational loss and recovering revenue, totaling $1.4 million
- ▸ Utilized large-scale data mining and built ad-hoc queries to create meaningful reports on carrier performance and to pinpoint origin to destination variances
- ▸ Implemented data automation, reducing data entry needs and contractor headcount by 50%
- ▸ Led the negotiation and recovery of $720,000 through root-cause analysis, research and consistent follow-up
- ▸ Coordinated and led monthly operation meetings with commercial leadership to highlight focus areas and organize necessary actions in the field, improving losses from .19% to .07% in the West Texas region
